CAREER BRIEF

Dr. James Lange serves as SDSU's first Coordinator of AOD Initiatives. In that role, he developed a system of describing the functional elements of a comprehensive prevention strategy. This award-winning system has been adopted beyond SDSU, including its use within the California State University system. For over two years (2014-2016), Dr. Lange also served as SDSU's first Director of the newly autonomous Health Promotion Department within the Division of Student Affairs. In that role, he oversaw the creation of a dynamic department that seeks to improve the behavioral health of SDSU students. He also chairs the Alcohol and Other Drug (AOD) Strategic Plan Task Force for SDSU.

Dr. Lange also serves as the Executive Director of the Higher Education Center for Alcohol and Drug Misuse Prevention and Recovery, an academic center of The Ohio State University. The mission of the HECAOD is to promote student success nationally by providing data-driven solutions to alcohol and drug misuse. In an effort to meet this mission, HECAOD provides tools, training, and technical assistance on evidence-based strategies to campus professionals. Through the HECAOD, Dr. Lange has successfully led an effort to organize the various statewide AOD campus coalitions into the *National Consortium of Statewide Coalitions*. He serves the center through a cost-reimbursement arrangement between OSU and SDSU.

Dr. Lange's research has focused on behavioral-risk prevention, primarily studying the drinking behavior of young people. He was awarded one of NIAAA's five Rapid Response college-drinking research grants. Through this award and his other grants, Dr. Lange has focused on underage drinking, college binge drinking, and designated driver use. He has published articles in leading scientific journals on community responses to underage drinking, designated driver use, youth binge drinking, drunk driving and boating enforcement, tobacco use, prescription drug abuse, Salvia divinorum use, seat belt use, and roadside breath-test surveys.

His research and service career have earned him an international reputation within the field of AOD abuse prevention. In two consecutive years, 2014 and 2015, he was awarded the California State University Chancellor's award for his service towards statewide progress in AOD prevention. This established record of both research and community-level prevention implementation is what led the AB InBev Foundation to tap him, along with an international team of experts to assist in the Global Smart Drinking Goals: City Pilot program. Dr. Lange serves as an expert coach for selected cities attempting to implement community-level, evidence-based environmental prevention programs to reduce the harmful use of alcohol.

For over two decades, Dr. Lange has used both laboratory and field-survey methodology to conduct scientifically rigorous examinations of the cognitive effects of alcohol use and social-cognitive determinates of designated driver use. He has served as an important resource for community organizers seeking to implement environmental interventions designed to reduce or prevent binge and underage drinking. Dr. Lange serves as a science advisor for *RADD*, *The Entertainment Industry's Voice for Road Safety* and their California Coalition, a project bringing State, industry, and prevention resources together to reduce drunk driving. He has served the field by volunteering in leadership roles within various organizations, including NASPA AOD Knowledge Community, The Network Addressing Collegiate Alcohol and Other Drug Issues, and the San Diego County Binge and Underage Drinking Initiative.

Dr. Lange is committed to helping address disparities in well-being outcomes. Since 2018, he has been a recognized co-leader of the Action Network for Equitable Wellbeing (ANEW; formally known as the 20x30 Network; see <https://anew.nyu.edu/who/leadership/>), hosted by New York University. ANEW is structured with an *Improvement Science* approach to creating system changes to better serve all students. Through presentations and facilitation of *Action Labs*, Dr. Lange has helped campuses assess wellbeing in a meaningful way that address inequities and disparities using the free ANEW Wellbeing Improvement Survey for Higher Education Settings (see <https://anew.nyu.edu/what-we-do/wishes/>).

Among his contributions to SDSU campus life, he serves on the following: Senate representative for the Intercollegiate Athletics Council; member of the Young Men of Color Study Group; the Center for Skateboarding, Action Sports and Social Change; Aztec Nights Management; Dead Naming Task Force; Co-Chair of the AOD Task Force; Weber Honors College Fellow; and Wellbeing Improvement Survey for Higher Education Settings (WISHES) Steering Committee. He is frequently a mentor for graduate students from the College of Public Health, Department of Psychology, and the School of Social Work.

PROFESSIONAL BACKGROUND

2001–Present Student Service Professional—Academic Related (Level III, Full Professor Equivalent) Faculty with Tenure, Coordinator of Alcohol and Other Drug Initiatives; Adjunct Professor, Departments of Psychology and Social Work; Doctoral Faculty, Graduate School of Public Health, San Diego State University; Principal Investigator, San Diego State University Foundation

2017—Present Executive Director, The Higher Education Center for Alcohol and Drug Misuse Prevention and Recovery, The Ohio State University, Columbus, Ohio

2014—2016 Director, Health Promotion Department, Division of Student Affairs, San Diego State University

- 2001–2001 Senior Research Scientist, Pacific Institute for Research and Evaluation, Calverton, Maryland
- 1993–2001 Statistics Instructor, Department of Psychology, University of Maryland, College Park, Maryland
- 1999–2000 Research Scientist, Pacific Institute for Research and Evaluation, Landover, Maryland
- 1996–1998 Associate Research Scientist, Pacific Institute for Research and Evaluation, Bethesda, Maryland
- 1992–1996 Research Associate, Pacific Institute for Research and Evaluation, Bethesda, Maryland

TEACHING AND GRADUATE MENTORING EXPERIENCE

- 1993 Introduction to Social Psychology, University of Maryland, College Park. A survey course offered within a large lecture environment (300+ students) introducing students to the foundational theories and research in social psychology.
- 1993–2001 Introduction to Statistics for Psychology, University of Maryland, College Park. A course that teaches the basic skills for conducting inferential and descriptive statistics used within psychological sciences.
- 2003 The Psychology of College Binge Drinking: Epidemiology, Etiology, Prevention and Treatment, San Diego State University. This upper-division seminar course explored the current state of research, spanning many disciplines within psychology, focusing on the problem of college student alcohol use.
- 2008 University Seminar, San Diego State University. A class dedicated to teaching freshmen the skills necessary for academic success at SDSU.
- 2010 The Psychology of College Binge Drinking: Epidemiology, Etiology, Prevention and Treatment, Pitzer College. As a visiting professor, taught an updated version of this upper-division seminar exploring the current state of research, spanning many disciplines within psychology, focusing on the problem of college student alcohol use.
- 2001-present Dr. Lange typically supervises between 1-5 Masters or Doctorate level graduate interns from psychology, social work and public health departments. In addition to these interns, he is typically asked to mentor between 1-3 Masters or Doctorate level graduate students per year through their cap-stone, thesis or dissertation requirements.

EXTERNAL GRANTS AND CONTRACTS (SDSU ONLY)

Experimental Testing of the Designated Driver Concept (R01 AA12445, DHHS National Institute on Alcohol Abuse and Alcoholism, Lange PI, \$444,242) The research was designed to address factors that may impede proper implementation of the designated-driver concept. The study included six intervention trials are proposed. These were designed to 1) cue the use of designated drivers, 2) change the attitudes of the group, and 3) affect group norms to support the proper use of designated drivers. Each trial used random assignment and was conducted at the San Ysidro border crossing. 2001-2004 (transferred from PIRE).

Alcohol Research Collaborative: Alternative Program (U01 AA014738 DHHS National Institute on Alcohol Abuse and Alcoholism, Lange PI, \$624,485) The Principal Investigator (Dr. Lange) would serve both a consulting and research role for the Institutions of Higher Education (IHE). A collection of prominent college-alcohol prevention researchers has come together to form the Alcohol Research Collaborative (ARC). While each individual researcher has broad research experience, each also possesses identifiable areas of unique expertise. Together these areas of expertise represent the fulfillment of a comprehensive approach to college alcohol abuse prevention. 2003-2009.

CHOICES/e-CHUG Development Project (R43 AA015002 DHHS National Institute on Alcohol Abuse and Alcoholism, Lange PI, \$22,500) The project was a collaboration with The Change Companies on the proposed creation of an e-CHUG version of the CHOICES alcohol education program. Data collection occurred on the SDSU campus, under the direction of Dr. James Lange. His offices conducted both focus groups of students, as well as the classroom trials of the new program materials. The project tested the feasibility of new versions of the CHOICES alcohol abuse prevention product line for college students to develop an integrated assessment and feedback instrument to incorporate into the existing products. 2004-2005.

Investigating Collegiate Natural Drinking Groups (R21 AA016800, DHHS National Institute on Alcohol Abuse and Alcoholism, Lange PI, \$317,039) The project investigated collegiate drinking-group construction, motivations, and dynamics. A better understanding of these phenomena provides insights into the general phenomenon of college students' alcohol abuse and helps guide future intervention efforts. To achieve this general aim, the research developed and tested a paradigm for measuring processes of naturally occurring collegiate drinking groups. The research advanced our ability to measure and understand the dynamics of natural drinking groups within the context of college drinking behavior. 2008-2011.

ARRA: Disclosing Contents of Drinks: Experimental Test on Natural Consumption Behavior (RC1 AA019004, Lange PI, \$702,873). The purpose of this project was to develop and test brief communications of nutrition facts and alcohol contents that a) individuals can effectively use to monitor their consumption, b) can motivate them to drink moderately, and c) could be required within bar and restaurant menus by future policies. 2009-2012.

RADD California Coalition Evaluation (CA OTS subcontract, various years/pass-through administrators, Lange PI \$118,512) This project evaluated the effectiveness of statewide events conducted on campuses across the State to raise student awareness of the RADD Designated Driver Rewards program; determine the effectiveness of campaign material distribution on campuses across the State, and facilitate the identification and documentation of deviations from expected statewide campus deployment of the RADD messages and determine the impact (positive, negative or neutral) of those deviations on project objectives. 2006-2007, 2011-2012, 2016-2017.

Executive Director of the Higher Education Center for Alcohol and Drug Misuse Prevention and Recovery (The Ohio State University, Lange PI, \$206,276). The Ohio State University Higher Education Center on Alcohol and Drug Misuse Prevention and Recovery (HECAOD) offers training, tools and technical assistance opportunities to develop, implement and evaluate to campus professionals and students interested in preventing collegiate alcohol and other drug misuse harms, as well as recovery support. This contract supports Dr. Lange's time to serve as Executive Director. 2017-Present.

Subcontract to support the HECAOD/RADD Concert Venue and Collegiate Impaired Driving Prevention Program Development and Evaluation. (OTSO grant subcontract from the OSU, Lange PI, \$400,821). Develop a community oriented impaired driving prevention program for the State of Ohio, focusing on tying concert venue activity with on campus campaigns. 2018-Present.

Impact of Nonsmoking Constraints on Tribal Casino Operations (California Department of Public Health, Kamper PI, Lange Co-PI, Spilde, Co-PI, Klepeis, Co-PI, \$750,000). Multiple-method approach to understanding the impact of smoking bans on the performance of casino games within tribal hotel-casino resorts in California. Results both statistical analysis of slot machine data and from surveys of casino guests and employees will provide a more complete picture of the nonsmoking effects on the overall casino business levels.

Evaluation of the Sea Tow Foundation's Designated Sober Skipper Program through a Sea Tow Foundation awarded subcontract (\$76,972) from their U.S. Coast Guard grant. Dr. Lange serves as Project Director to conduct scientific research of boaters to determine if the Sober Skipper message is resonating with boaters and, in so doing, determine if there is a difference in alcohol consumption among boater operators and passengers who receive the Sober Skipper message versus those who do not get that message prior to a boating trip.

Subcontract to support the HECAOD efforts to educate campus professionals and community partners on effective impaired driving prevention strategies (\$38,566). By working with identified key campus and community stakeholders and providing training on collegiate impaired driving issues and effective prevention strategies. The establishment of a Networked Improvement Community (NIC) that consists of at least three institutions of higher education (IHEs) and three community partners as well as development a brief measure that can be used for the surveillance of impaired driving behaviors and document improvement as the campuses implement strategic actions that will theoretically produce change. (2023-Present).
